

250

metres was the record distance flown by Otto Lilienthal in his "normal soaring apparatus."

## Air

For centuries, mankind dreamt of flying. Brave men and women risked their lives making highly dangerous attempts at flight. Our aviation exhibition casts the spotlight on some of these pioneers, who defied gravity in flying machines, balloons and airships. You'll encounter the Baade 152 in a room all to itself - an aircraft for the East German aircraft industry. So promising at its launch, and yet production of this first German jet-propelled aircraft ceased not long afterwards. But how do aircraft fly at all? Explore the phenomenon of air in our experiment room.

## Water

Welcome aboard our permanent exhibition, "Cast off!" Within the spectacular, stylised hull of a ship, travel through 1,000 years of nautical history, both on inland waterways and on the high seas. See and hear how mariners once navigated the oceans, how passengers aboard the great transatlantic steamers dined and how crews had to toil aboard vessels in the East German fishing fleet. And compete head to head with other seafarers in our digital regatta game.

735

kilometres was the length of the route plied by tugboats on the Elbe from Hamburg to Bohemia at the end of the 19th century.

## Model railway

Our O-gauge model railway display has more than 200 locomotives, railway carriages, and goods wagons making their way around its tracks. With an area of 325 m<sup>2</sup>, it is amongst the largest of its kind in the world. It also features a built-in narrow-gauge railway that you can operate by hand.

You can find the daily running times on our website.

325

square metres is the size of the area covered by our O-gauge model railway display.

## € Admission prices

Free admission for children under 6 years.

**Full-price admissions** 11 euros

**Concessions** 5 euros  
e.g. children, school pupils, trainees and apprentices, university students, people with disabilities and the unemployed

**Family ticket (small families)** 11 euros  
1 adult and up to 2 children aged 16 or under

**Family ticket (larger families)** 22 euros  
2 Erwachsener und max. 4 Kinder bis 16 Jahre

**Groups of 10 or more**  
Full-price admissions 9,50 euros  
Concessions 4,50 euros

**Annual pass** 30 euros  
Annual pass, concessions 14 euros

All tickets can be easily purchased online.

## 📱 The Transport Museum App

Download now for free!  
Available in your device's app store (Android or iPhone). Audio tour with information on featured exhibits.

## H Directions

Tram 3/7 to Pirnaischer Platz, Tram 1/2/4 to Altmarkt or Tram 4/8/9 to Theaterplatz  
Public car parks available

## ♿ Accessibility

All exhibitions are accessible to disabled persons. To use the lift, please ask a member of staff. With the exception of assistance/guide dogs, animals are not permitted in the museum.

# Understand technology!

Visit the Johanneum at the Neumarkt in Dresden to go on an adventure through the history of mobility.

The Transport Museum brings together fascinating objects from the history of mobility on water, in the air, on roads and by rail - all under one roof. Discover interesting and exciting stories about the vehicles - and the people - that move us, and learn about technology at the same time.

## 1895

Adolf Schöche builds a steam powered car that is today thought to be the oldest Saxon automobile in existence.

## Roads

From stately coaches to state-of-the-art electric cars - our exhibition shows you key vehicles from 200 years of road transport history that still fascinate people today. We demonstrate the decisive steps in the development of the cars, motorcycles and bicycles that we know today. See and hear fascinating stories about the people behind these brilliant inventions. And learn about their flashes of inspiration that changed the way people live their lives. Numerous interactive stations allow you to get involved. Climb onto a penny-farthing, for example, or design your own vehicle of the future in our digital Future Lab.

## Rail

Our exhibition on railway transport starts with a railway history legend: "Saxonia", the first functioning locomotive in Germany (replica). This forms the start point for your tour through different eras and historic locomotives and railway carriages. Climb up into some of the driver's cabs and experience for yourself how railway history looked, felt and smelled.

## 1839

The first long-distance railway line in Germany is opened between Leipzig and Dresden. The "Saxonia" was there too.
